

报名抽奖

功能概述

本模块主要处理报名抽奖相关逻辑，如抽奖开始、结束和更新等事件消息。

初始化及销毁

在实例化该模块并进行使用之前，需要对SDK进行初始化配置，详细见[参考文档](#)。

在线文件引入方式

```
// script 标签引入，根据版本号引入JS版本。  
<script src="https://websdk.videocc.net/interactions-receive-sdk/0.24.0/lib/polyv-ir.umd.js"></script>  
  
<script>  
  const { EnrollLottery } = window.PolyvIRSDK;  
</script>
```

import 方式引入（推荐）

```
import { EnrollLottery } from '@polyv/interactions-receive-sdk';  
  
const enrollLotterySdk = new EnrollLottery();  
// ...  
// 销毁 SDK 实例，清除逻辑  
enrollLotterySdk.destroy();
```

使用流程

监听“报名抽奖”事件

```
// 更新抽奖信息事件
this.enrollLotterySdk.on(this.enrollLotterySdk.events.UpdateLotteryDetail, (msg) => {
    console.log('收到更新抽奖信息消息', msg);
});
this.enrollLotterySdk.on(this.enrollLotterySdk.events.StartLotteryForSignUp, (msg) => {
    console.log('收到开始抽奖事件', msg);
});
this.enrollLotterySdk.on(this.enrollLotterySdk.events.EndLotteryForSignUp, (msg) => {
    console.log('收到结束抽奖事件', msg);
});
```
