

Function: getLangData()

```
getLangData(): object
```

根据当前语言获取多语言配置

Returns

```
object
```

latency.name

```
name: string = '延迟模式'
```

latency.option0

```
option0: string = '正常延迟'
```

latency.option1

```
option1: string = '无延迟'
```

level.name

```
name: string = '清晰度'
```

level.option0

```
option0: string = '流畅'
```

level.option1

```
option1: string = '高清'
```

level.option2

```
option2: string = '超清'
```

line.name

```
name: string = '线路'
```

rate.name

```
name: string = '倍速'
```

tips.error

```
error: string = '请联系管理员 LIVE-#'
```

tips.waitStart

```
waitStart: string = '当前暂无直播'
```
