

Android-WebView中连麦问题

问题详述：

使用WebView加载SaaS-H5观看页时，点击请求连麦按钮闪退或无反应

解决方案：

1. 检查原生app是否有麦克风，摄像头权限
2. 如果app已经有了相关权限，需要将权限授予到H5

```
private class MyWebChromeClient extends WebChromeClient {  
  
    @Override  
    public void onShowCustomView(View view, CustomViewCallback callback) {  
        showCustomView(view, callback);  
    }  
  
    public void onHideCustomView() {  
        hideCustomView();  
    }  
  
    @Override  
    public void onPermissionRequest(PermissionRequest request) {  
        request.grant(request.getResources());  
    }  
}
```
